TERMS OF REFERENCE

OFFICE OF THE SOLICITOR GENERAL
Supply and Delivery of Wi-Fi Enabled Voice Over IP (VOIP) Phones

Background:

The Office of the Solicitor General (OSG) functions as the government's primary law office, tasked with representing the government, its agencies, and instrumentalities in many legal issues. Effective and efficient communication is essential to the OSG's activities, particularly due to its responsibility in collaborating with other governmental departments, courts, and other organizations.

The OSG is modernizing its infrastructure to improve efficiency and facilitate communication across its offices, making the use of Voice over IP (VoIP) technology a crucial element of its digital transformation strategy. VoIP technology provides a cost-efficient and adaptable alternative by facilitating telephony services via the internet, hence diminishing dependence on conventional telephone lines. The incorporation of Wi-Fi-enabled VoIP phones specifically fulfills the demand for enhanced mobility and flexibility in the workplace, enabling personnel to utilize communication services without being confined to a physical network.

Objective:

The primary objective of this project is to enhance the OSG's communication capabilities by adding new Wi-Fi-enabled VoIP phones to its existing infrastructure. These additional units will allow staff members to communicate more flexibly within the office, breaking free from the limitations of traditional wired phones. By utilizing VoIP technology, the OSG aims to improve connectivity, streamline internal communication, and support real-time collaboration across its departments, all while reducing costs associated with legacy telephone systems.

The project also seeks to future-proof the OSG's communication infrastructure by enabling scalability and adaptability. With the introduction of these Wi-Fi-enabled devices, the OSG will be better equipped to support remote and hybrid work setups, ensuring seamless communication regardless of location. Ultimately, the goal is to create a more efficient, mobile, and responsive work environment that enhances both productivity and service delivery within the OSG.
